Installed quality of our Brushed SS letters.

Close look at the quality of our polished stainless steel and brass letters

All our custom fabricated letters come with studs, spacers and template at no extra charge.

Back of letters with studs, spacers & template

FIXATION:

Straps

Stainless steel straps welded at the back of each letters.
This is for VHB tape, silicone, glue, etc application.

Rivet and Hex nuts.

Rivets are the most common form of fixation for METALLET.
It is a strong and sturdy fixation to hard surfaces such as cements, real woods, etc.

It is most effective fixation for uneven surfaces.

Rivet Nuts available in

USA: 6-32, 10-24, 1/4-20

Canada: M3, M4, M5, M6, M8

VHB tape

3M VHB (Very High Bond) tape can be use most effectively in flat and smooth surface where drilling is not possible such as on glass.

It is also the easiest way to install, just peel and stick!

L-clips

L-Clips are normally used where there is a need to frequently remove the letters.

L-clips will fix to the letter using tiny stainless steel screws which is barely visible.

To remove the letter, just unscrews the tiny screws and remove it.

Solid cut letters and Logos:

Solid cut letters with stud or VHB tape options

Brass picture cut out

Printed on face gold titanium SS

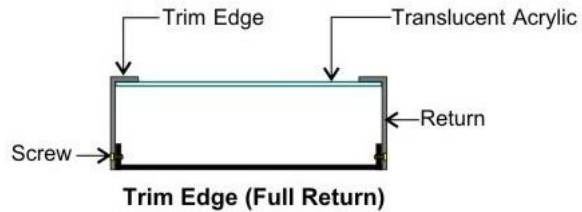

Multi-layer solid cut

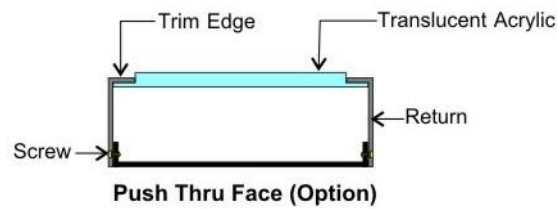

Our **stainless steel channel letter** is an excellent way to illuminate. Its metal casing of your choice holds translucent acrylic face with perfect fit. Seamless trim ensures that your illuminated channel letter has glossy finish edge for maximum front and side visibility with luxurious looks.
